Social drinking is not:
three fast martinis before lunch
having to drink to have fun
gulping drinks on an empty stomach
forgetting what you did while drinking
drinking and worrying alone
showing off how much you can hold
using alcohol as a problem-solver

Where does social drinking end and problem drinking begin? There's no simple answer. But here's a pretty good definition:

If you need a drink to be social, that's not social drinking.
